

KARPOWER

**Forget traditional power plant lead times.
We are bringing the future 2 years forward.**

Built on nearly 80 years of industrial heritage and three decades of global energy expertise, Karpower Group bridges a proven legacy with a zero-emission future. With an active presence across 20 countries, we are the world's largest gas-to-power provider. Our 150-acre hub in Brownsville, Texas, serves as America's premier power integration center, allowing us to deliver rapid, scalable, and integrated power solutions that traditional grids simply cannot meet.

Scalable Power Solutions for Data Centers

Karpower is dedicated to addressing the imminent global power supply and demand gap, purpose-built for the massive energy requirements of AI and modern hyperscalers.

By utilizing front-loaded and secured engine and turbine deliveries, we bypass the market's traditional 5-year lead times. Our solutions, ranging from floating Powerships to land-based Gigawatt Parks, bring power where AI is, and take AI where power is.

**21 GW
SECURED**

Engine and turbine delivery pipeline through 2031.

**8.5 GW
DELIVERED**

A proven track record of reliable power.

**2 YEARS
FASTER**

Bypassing traditional market lead

**12,000 MW
SUPPORTED**

With an average mobilization time under 20 days.

**150-ACRE
HUB**

America's premier power integration center in Brownsville, Texas

**100%
INTEGRATED**

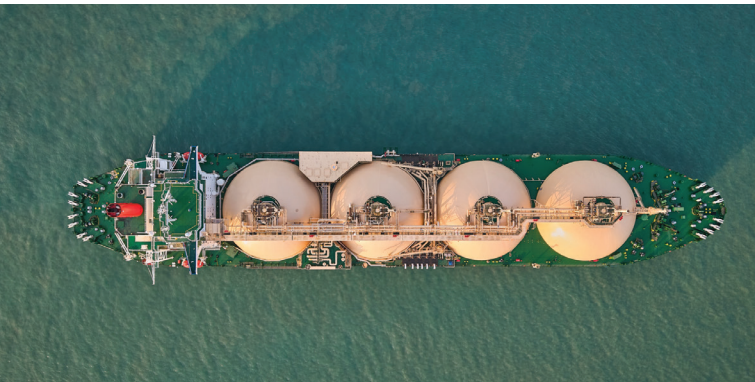

Direct access to US fiber, grid, and abundant gas supply pipelines.

The World's Only Floating Power Fleet

We build, own, and operate the world's only floating power fleet. As the fastest power solution in the market, our rapid deployment capabilities ensure plug-and-play integration in record time. With over **8,000 MW** installed capacity and a fleet of **45 Powerships** across **4 continents**, we eliminate construction risks. Offering multi-fuel capabilities and a **99% fleet availability** alongside both short and long-term operational flexibility, we deliver highly efficient energy at competitive market rates.

Your Green Energy Partner

Driving the energy transition, we build and operate an integrated portfolio of LNG-to-Power, renewable, and decarbonization solutions. Through active investments in clean tech startups, we act as an agent of change for a sustainable future.

11 Floating LNG Assets

A robust fleet including FSRUs and LNG carriers, providing the first entire LNG-to-Powership value chain in Brazil and Senegal.

Advanced CCUS

Innovative ship-based carbon sequestration technology designed to safely store emissions in depleted subsea gas wells.

Next-Generation Shipbuilding

As a fully integrated industrial powerhouse, we pioneer global asset conversion and newbuild capabilities through our world-class shipyards in Türkiye and USA, alongside strategic partnerships in Asia and the Netherlands. From floating data centers to LNG containerships, we have the agility to move fast and the expertise to deliver end-to-end solutions.

› Turn-Key Shipbuilding

All-in-one capabilities spanning concept engineering, asset conversion, full yard integration, and long-term operational accountability.

› Site Preparation

Over 70 completed global operations with an average mobilization time under 20 days.
