

KARPOWER

Powering What's Next

**Behind-the-meter
power solutions**
for America's most
critical industries

Where Energy

Meets Intelligence

Karpower is a next-generation power infrastructure company delivering fast-track, behind-the-meter energy solutions for industries that can't afford delays.

Built on more than 80 years of industrial and power infrastructure heritage, we design, engineer, and operate modular power systems that bring speed, scalability, and certainty to the world's most urgent energy challenges.

We deploy power with speed, scale, and certainty, where and when it matters most.

80+ years
of track record

Operations across
30 countries

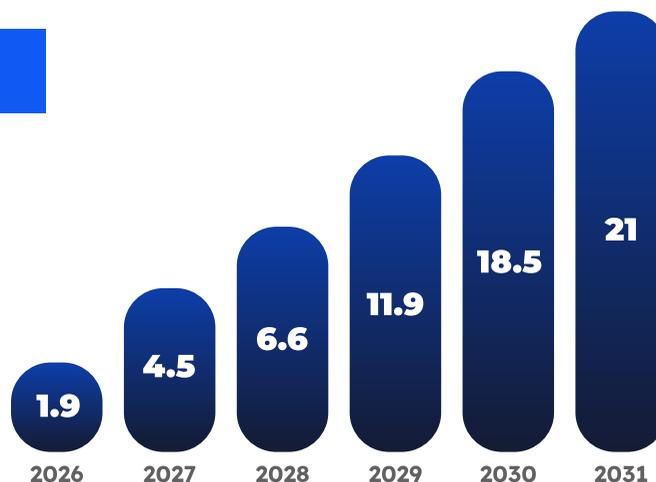

Behind-the-meter
power solutions

A Fast-Track Answer to America's Power Challenge

Karpower is executing a structured deployment roadmap to deliver 21 GW of behind-the-meter capacity across the United States by 2031.

21 GW by 2031

Behind-the-meter.
On-demand.
At scale.

Values shown in GW, rounded for clarity

KARPOWERVALLEY

Made in the USA Power Infrastructure

Karpower Valley is a next-generation U.S. industrial campus in Brownsville, Texas, where modular power infrastructure is manufactured, assembled, tested, and commissioned in one fully integrated location.

Fully Integrated Power Manufacturing Hub

Reducing project delivery timelines by up to 2 years.

Strategic Location – Brownsville, Texas

Direct access to port logistics, gas pipelines, and transmission infrastructure.

Scalable Gigawatt Capacity Platform

Supporting multi-GW deployment with accelerated ramp-up capability.

American Workforce & Industrial Ecosystem

US-based engineering and OEM partnerships ensuring resilient, high-quality execution.

“Energy solutions delivered
2 years faster”

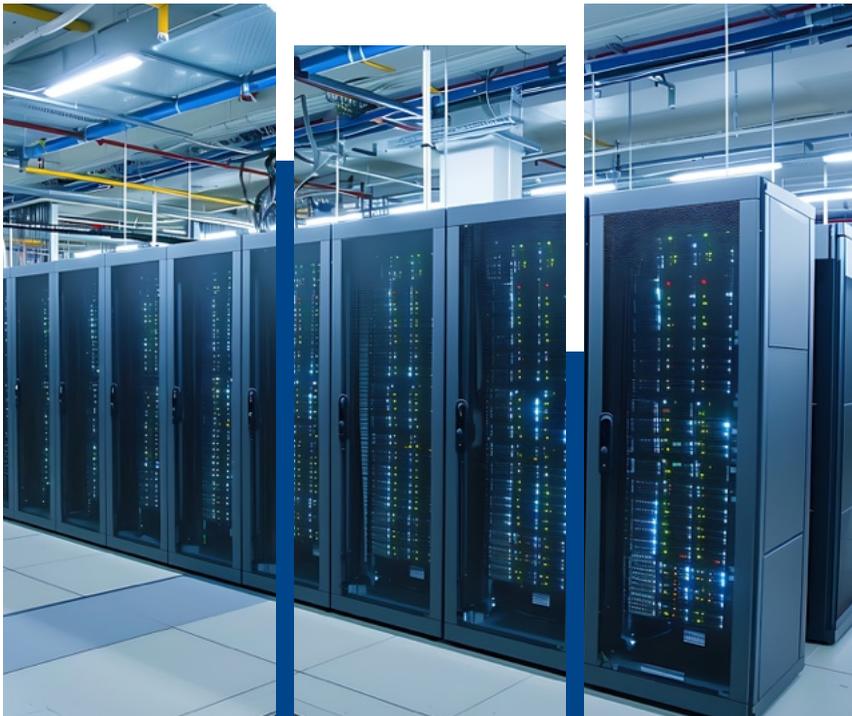

KARPOWERDATA

Power-Ready Data Centers for the AI Era

AI data centers are no longer limited by computer technology, they are limited by infrastructure. Karpower Data removes these bottlenecks by integrating power, land, cooling, and connectivity into a single, execution-ready platform.

Integrated Power Infrastructure

Behind-the-meter and grid-connected solutions delivering immediate, scalable megawatt capacity for AI workloads.

Development-Ready Campuses

Pre-engineered infrastructure for rapid hyperscale deployment.

Advanced Cooling & Water Integration

Optimized systems designed for high-density GPU environments and next-generation AI clusters.

Flexible Deployment Models

Land-based campuses and floating Dataship solutions eliminating grid and transmission bottlenecks.

The Karpower Advantage

Agility

Delivering power solutions 2 years faster than traditional projects.

Reliability

80+ years of industrial expertise across 30 countries.

Innovation

Integrated energy and technology platforms designed for next-generation demand.

Partnership

Strategic collaboration with leading OEMs and technology providers.

Infrastructure
with Speed.

Power with
Certainty.

Built for
America's Next Era.
