

# KARPOWER

## Modular Power. Delivered Faster.

### The Building Block of Fast-Track Power

Karpower's modular architecture is built around Power Blocks: standardized, scalable power units engineered for speed, reliability, and flexibility.

Ranging from 100 to 800 MW, our power blocks can be deployed individually or combined to form Power Parks for water-based deployment or Gigawatt Parks for land-based deployment.

## POWER PARK

### Rapid Deployment, Flexible Location.

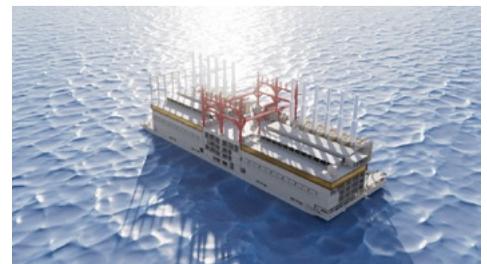

Power Park is Karpower's modular, water-based power solution designed for rapid deployment where speed, flexibility, and access are critical.

WHALE CLASS  
600 MW

SEA LION CLASS  
300 MW

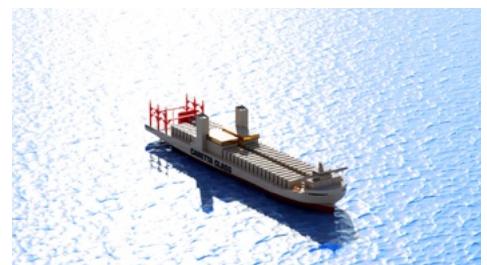

ORCA CLASS  
270 MW

DOLPHIN CLASS  
800 MW for 60 Hz, 600 MW for 50 Hz

SEA HORSE CLASS  
125 MW

CARETTA CLASS (BESS)  
500 - 1000 MWh

# Powering What's Next

**Karpower** is a next-generation power infrastructure company delivering fast-track, behind-the-meter energy solutions for industries that can't afford delays.

Built on more than 80 years of industrial and power infrastructure heritage, we design, engineer, and operate modular power systems that bring speed, scalability, and certainty to the world's most urgent energy challenges.

We deploy power with speed, scale, and certainty, where and when it matters most.

## The Karpower Advantage

### **Agility**

Delivering power solutions 2 years faster than traditional projects.

### **Reliability**

80+ years of industrial expertise across 30 countries.

### **Innovation**

Integrated energy and technology platforms designed for next-generation demand.

### **Partnership**

Strategic collaboration with leading OEMs and technology providers.
